(864) 944-2763 Email: jteate@mindspring.com

I am a self-motivated business professional with extensive background in project management, information architecture, business process software development and systems software/database integration. With over twenty years of experience in managing, supporting and developing business information systems my success is founded in a true commitment to quality work. My experience ranges from hands-on development of comprehensive software solutions, maintaining existing applications, systems design/analysis/implementation, client training/presentations/workflow analysis/consulting and managing departmental technology teams. All my projects have been user oriented toward specific department goals while at the same time achieving the full potential of current and emerging technologies. My client management style is team oriented with a heavy emphasis on customer satisfaction.
